

Cerebrum Blocks
THE LEGO OPERATING SYSTEM
FOR AI

SEED STAGE • \$1M ASK

The Windows of AI. Swap one container. Enter a new industry.

Cerebrum Blocks is a modular AI operating system — 58 blocks, 8 containers, 1 Event Bus. Replace the Construction container with Medical, Legal, or Finance and instantly deploy a fully-functional domain AI platform. We don't sell AI. We sell the mechanism to build AI businesses.

THE PROBLEM

- ✗ Companies spend 3-6 months on AI plumbing before writing a single line of business logic
- ✗ Every new industry vertical requires rebuilding the entire stack from scratch
- ✗ No standardized contracts between AI components — every integration breaks differently
- ✗ Switching AI providers requires rewriting hundreds of lines of routing code

5-LAYER ARCHITECTURE

Layer 0 — Infrastructure	HAL • Config • Memory
Layer 1 — Security	Auth • Audit • PII Redact
Layer 2 — AI Core	Router • Failover • Analytics
Layer 3 — Domain [SWAP]	Construction • Medical • Legal
Layer 4 — Block Store	Marketplace • 20% fee
Layer 5 — Event Bus (Block 42)	Cross-container comms

THE CONTAINER SWAP

● Construction AI	LIVE
● Medical AI	\$499/mo
● Legal AI	\$399/mo
● Finance AI	\$599/mo

BUSINESS MODEL

Platform SaaS \$29–\$299/mo

Lego Tax 20% of all block sales

Enterprise Domain Packs \$499–\$999/mo

SEEKING

\$1M

Series Seed

Same engine. Different Layer 3.
New \$500M market. No rebuild.

White-label
deployment

Custom
pricing

10K devs × \$29/mo = **\$290K
MRR**

→ 3 engineers hired (6 months)

→ Block Store public launch

→ 3 GCC enterprise contracts

→ npm + PyPI publication

TRACTION

- ✓ Platform live on Render
- ✓ Construction container live
- ✓ Python + JS SDKs
- ✓ PDF→OCR→Chat chain 8s
- ✓ 58 blocks deployed
- ✓ Block Store + Lego Tax
- ✓ Docker Hub published
- ✓ Domain Spec published

COMPETITIVE MOAT

- 🔒 10-block chain = switching cost. Once wired in, you cannot leave without rebuilding your foundation
- 🏗️ 20+ years GCC construction expertise baked into Layer 3 — not replicable by generic AI platforms
- 🌐 OpenAI is a destination. Cerebrum is infrastructure. Different buyer, different budget, different retention
- 📦 Domain Container Spec published — community builds packs, platform collects 20% forever
