

Factory Floor

Tell the factory what to build. The architect drafts, you approve, the generator ships.

This is the factory floor. Describe the platform you need — I will draft a blueprint, and on your word the factory builds it.

build a platform for retail

Blueprint drafted: Unified Retail Operations Platform (retail). 6 capabilities, 17 blocks. Reply 'approve' to generate the product, or refine your brief.

Unified Retail Operations Platform

RETAIL

An end-to-end retail operations platform that unifies product catalog and inventory management, omnichannel order orchestration, customer engagement, and real-time analytics for retailers operating across physical stores, online channels, and marketplaces. It serves merchandising teams, store operations, fulfillment coordinators, and customer-facing staff with a single source of truth for products, orders, customers, and store estate performance.

CAPABILITIES (6)

Tick what the platform should include, then approve.

☒ **Product Inventory Management**

REUSE

Centrally manage product catalogs, SKUs, variants, pricing, and inventory across all channels and warehouses, ensuring consistent, accurate data from listing to fulfillment.
