

Non-Objection Certificate				
NOC Reference	0095-DG2-PR		Issue Date	13\02\2025
Project Information: This project is for Street Light detail design. The scope of works is related to Package 1 in Diriyah Gate Phase II development.				
Project Name	DG II – Street Light Infra Package 1			
From	Asset Management	To	DevCo	
Plot	DG II – Public Realm	Area size		NA
District	DG 1 / Wadi Hanifah	☐	Diriyah Gate 2	☒
	Wadi Safar	☐	Diriyah Gate 3	☐
Time Duration	6 months			
NOC Conditions & Remarks				
Asset Management Design Review Committee				
1. AMCO hereby confirms no objection on the street lighting design packages that is reviewed and approved the PMC in accordance with the contract requirements.				
2. Any abortive work carried out by the Devco Contractor due to lack of coordination with other trades/networks from masterplan changes, AM doesn't hold any responsibility.				
3. All conditions that were issued in the previous NOC as part of Infrastructure package dated 12-Feb.-24 shall be addressed as applicable.				
4. All internal and external stakeholder approvals shall be obtained as applicable.				
5. All equipment used for street lighting package shall be in compliance with SASO specifications.				
6. Pole design shall be obtained separately as required.				
7. The Street Lighting system will be designed and implemented in a way that: a) Compliant with the Sustainability Guidelines b) Allows for centralized remote monitoring and control c) The system implements Open Protocols or APIs for integration at sitewide level d) Complies with Smart City guidelines for DG2				
8. Ensure that the feeder pillars are located in easily accessible areas for routine maintenance, troubleshooting, and future upgrades.				
9. Pole design must allow for safe and efficient maintenance procedures. Ensure that maintenance teams can easily access the luminaires for bulb replacements and cleaning.				
10. Cable street light infrastructure should be accessible for maintenance purposes and should not pass under any heavy fixed assets such as bus stations or any abstracts that may affect the cable routing.				
11. AM will follow up in the next design stage.
