

Infrastructure Design Certificate

Project Name	Diriyah Gate II Infrastructure Package 1 (Stormwater)		
Project Owner/Developer	DGCL		
Design Consultant	Jacobs	Reference	20212200076

Applied Design	Concept Design	☐	Detailed Design	☒
Applied System(s)				
Roadworks	☐	Power	☐	
Potable Water	☐	Waste-water	☐	
Stormwater	☒	Irrigation	☐	
Telecommunications	☐	Landscape	☐	
Security	☐	Waste-Management	☐	
Way-finding Signage	☐	Street Lighting	☐	
District Cooling	☐	Other: (Bike path, Adjust curb and planters)	☐	

Comments

General:

1. Ensure all services are within their dedicated corridor and there is no clash.
2. Ensure all interfaces points with adjacent infrastructure are coordinated prior to construction stage.
3. Ensure outfall locations are coordinated and that oil interceptor is provided before stormwater outfall to Wadi.
4. Ensure to coordinate with all stakeholders for any demolishing of existing storm network / culverts.
5. Ensure to coordinate and get approval from all stakeholders for any crossing / micro tunneling.
6. Ensure to obtain operator NOC/Approvals for stormwater network prior to construction stage.
7. Vortex circular manhole and rectangular manhole are considered out of our review scope at this stage. And to be provided for review in next construction permit stage.
